MANUFACTURERS OF  
PRECISION CULTIVATING  
EQUIPMENT SINCE 1964

## *Precise spray application at an affordable price!*

For full season chemical application you can't beat the precision and economy offered by the Dickey Layby Sprayer. Individual wheeled row units float independently in each middle and

carry your choice of one, two or three nozzles per middle.

Our parallel action arm

assembly assures a consistent spray pattern even in the most inconsistent terrain. Sealed, yoke-mounted bearings in each gauge wheel assure years of trouble-free life. Teejet nozzles are also standard equipment. All row units are mounted on a 4" x 4" heavy wall tool with 1/2" u-bolts. Available options include folding tool bars, tool bar mounted tanks, pumps and gauge wheels, diaphragm shut-offs and over the row spray. You can even upgrade to a 7" x 7" tool bar if desired. We build 'em the way you want 'em.

### **Easy adjustment!**

With the Dickey Layby Sprayer, spray pattern adjustment is a snap. Since all three nozzles are attached using a single bracket coverage can be broadened or reduced simply by raising or lowering the spray bar that is attached by a single u-bolt to the row unit.

Shut-off valves can be added so that

spray can instantly be changed from three nozzle application to one.

### **Stealth Option**

The Dickey Layby Sprayer can be further enhanced by adding our exclusive Stealth Hood option. The smooth lines of this molded high density polyethylene hood enables the sprayer to glide through "middle crowding" crops with a minimum of crop damage while getting the maximum amount of chemical on target.

Nozzle options with the Stealth remain the same and conversion from regular to Stealth is simple and easy. You can also choose from 20 and 27 inch wide hoods.

Regardless of how you choose to deck it out, you can be assured that your sprayer is assembled with the finest components available and designed to perform for many years to come.

ROW MODEL	ROW WIDTH	PRICE
4	38-40	\$1620
6	38-40	2488
8	38-40	3256
12	38-40	4840

ABOVE PRICES ARE FOR BASIC UNITS MOUNTED ON A 4" X 4" TOOL BAR WITH ONE NOZZLE PER ROW. FOR 3 NOZZLE PER ROW KIT ADD \$61 PER ROW. CALL FOR PRICES ON ADDITIONAL OPTIONS.
